	• You may propose your own projects, (after approval) • or you may propose alternate ideas based on the papers too • The added text is a mere anchor • Your project can also be an extended idea emerging from your paper presentation
1	1. https://openreview.net/pdf?id=5nNNVY8NW4 2. https://proceedings.iclr.cc/paper_files/paper/2024/file/682f87a8c306098ec8be29019bd76aa4 Does grokking depend on network size and/or compute budget allocation?
2	1. https://openreview.net/forum?id=4FWAwZtd2n 2. https://arxiv.org/pdf/2602.16490 Can we come up with some task dependent compute allocation laws?
3	1. https://openreview.net/forum?id=rk2L9YGDi2 2. https://openreview.net/forum?id=vo9t20wsmd Based on the above two papers, can you propose a novel hardware aware speculative decoding?
4	1. https://arxiv.org/pdf/2511.00868 2. https://openreview.net/pdf?id=r3mQiuYKIN Explore alternate KV retention methods such as say reasoning requirement dependent
5	1. https://proceedings.mlsys.org/paper_files/paper/2025/file/66a026c0d17040889b50f0dfa650e 2. https://openreview.net/pdf?id=PDu13oOl4G Inspired by above studies, can we now propose a hardware agnostic LLM serving approach?
6	1. https://proceedings.neurips.cc/paper_files/paper/2024/file/4c2092ec0b1370cce3fb5965ab255 2. https://openreview.net/forum?id=MSHPrMpIHZ Can we design and robustly evaluate a hardware situation aware MOE?
7	1. https://openreview.net/pdf?id=11QZITAMUO 2. https://openreview.net/pdf?id=C8yjlrx4Wo Can we come up with a method to use uncertainty for optimal memory allocation?
8	1. https://openreview.net/pdf?id=ZGeVMaiIlb 2. https://openreview.net/pdf?id=WU86J4uM9V Can we come with up a better adaptive compression inspired by these papers and beat the benchmark
9	1. https://openreview.net/forum?id=Y54P2BBPPh 2. https://openreview.net/pdf?id=i2SGjD0klj Can we merge the above two papers and extend the sample importance to include compute factor too
10	1. https://openreview.net/forum?id=11QZITAMUO 2. https://arxiv.org/abs/2502.20969 Combine 1 & 2
11	1. https://openreview.net/pdf?id=1FfmStySS1 2. https://openreview.net/pdf?id=CPCRITwAaP What is the importance order for fine tuning of such quantized models?
12	1. https://arxiv.org/abs/2606.09401 2. https://arxiv.org/abs/2605.17432 What is the relationship between #param updates and privacy leakage?

13	1. https://openreview.net/pdf?id=GO5BDH9Wyd 2. https://openreview.net/forum?id=xa3OnTb6c3 How does the resource budget – network size, memory affect transformer learning of circuits?
14	1. https://openreview.net/pdf/ea2a7de87c1a130887240f2c4f8ae85a2a091115.pdf 2. https://arxiv.org/pdf/2606.29983 Merge 1 +2 and study the impact of learned stochastic computation under fixed network size / fixed av
15	1. https://arxiv.org/pdf/2607.25451 2. https://aclanthology.org/2026.eacl-long.304.pdf Merge 1 +2 and study how is MIA affected during FP1 to INT8 to INT4 conversion?
16	1. https://openreview.net/forum?id=IzJ0S1VJol 2. https://ojs.aaai.org/index.php/AAAI/article/view/39517 3. https://arxiv.org/pdf/2606.09861 Can we combine these papers into a potential novelty?
17	1. https://www.nature.com/articles/s42256-026-01267-z 2. https://www.nature.com/articles/s43588-026-00974-2 Can we design hardware aware neural operators?
18	1. https://openreview.net/forum?id=5APgTKsnx8 2. https://openaccess.thecvf.com/content/CVPR2026/html/Zhang_Efficiently_Reconstructing_Dy 1+2 for a hardware aware 3D reconstruction
19	1. https://arxiv.org/html/2510.20331v2 2. https://arxiv.org/abs/2605.25127 Can we merge 1 + 2 towards a task aware compression strategy?
20	1. https://openreview.net/forum?id=71mdn3crgl 2. https://cvpr.thecvf.com/virtual/2026/poster/37428 Merge 1 and 2 towards a novel proposal
21	1. https://arxiv.org/abs/2508.02443 2. https://arxiv.org/abs/2603.09673 Can we improve on the role of uncertainty in better splatting?
22	1. https://aclanthology.org/2026.acl-long.285/ 2. https://aclanthology.org/2026.acl-long.285/ Merge 1 + 2 for a state aware decoding strategy?
23	1. https://arxiv.org/abs/2512.07580 2. https://arxiv.org/abs/2604.07812 3. https://arxiv.org/abs/2412.06263 Merge 1 + 2 + 3 for a resource availability aware pruning approach.
24	1. https://openaccess.thecvf.com/content/CVPR2026/html/Zhang_Hybrid_Token_Compression_f 2. https://openreview.net/forum?id=Bjq4W7P2Us Merge 1 + 2 to design a novel hallucination aware VLM compression
